Company Presentation

Faidra SA was established in the beginning of the 21st century, aiming at activating in the field of constructions as a byword for quality, consistency and functional luxury constructions, providing all comforts, with special emphasis on anti-seismic shielding and top quality materials. These activities extend in the fields of permanent dwellings (apartments, maisonettes), country houses (mansions, villas, traditional houses and maisonettes for summer and winter vacations) and real estate management.

The company's strategic goal is to make use of the experience, technical know-how and worldwide range of its dynamics and to exploit the special prospects offered by the unique geopolitical position of Greece. Especially in the field of residential development, Greece offers unique opportunities thanks to the excellent diversity of seaside, lowland and mountain landscape with the characteristic and recognizable architecture of the various regions of the country.

Within the scope of its strategic development, the company will continue to invest in Greece with innovative projects, in order to attract investors from Greece and abroad . Together with our managers, architects, lawyers and financial officers, we offer services so to finalise the purchase procedure.

Faidra's detached state of the art construction- Villa Faros-, built on a fascinating location in Sigri, on the west end of Lesvos island. On a property of approx. 100 hectares and at a part which is actually a peninsula (unobstructed view to the sea), our company has set top quality standards and constructed an innovative house from every aspect: functionality, design, quality of materials, innovative indoor and outdoor solutions.

Main Areas of Investment

Southern Suburbs (Voula, Varkiza, Miladeza)

Our main concern was to implement our projects in the Southern Suburbs, which, in our opinion, combine in a unique way, optimum climatic conditions, neighbouring to the best and organized beaches of Athens, while they are only at a short distance from the centre of the city, the Eleftherios Venizelos Airport, the 2 main ports of Piraeus and Lavrio and they have direct access to the Attica Road. Also, the Southern Suburbs have a carefully -elaborated street plan with large community spaces, walk ways, entertainment venues, sport venues and venues where young people can spend their free time creatively.

There are also yacht clubs, diving clubs, the closed swimming pool of Glyfada, the open swimming pool of Vouliagmeni, the Golf of Glyfada, many Tennis Clubs throughout the area and a lot of health clubs. Also, at a very short distance there are two of the best Thallasso- Resorts & Spas in Europe, the “Divani – Divani” and “Asteras” in Kavouri. Moreover, in these areas, there are modern private and public schools for all levels, as well as a lot of foreign language training schools, conservatories and computer schools. The complete market of these areas and the various quality suggestions for entertainments and fun do not have an impart on those who wish to live a quite life and make these areas ideal for you, offering well-being and a life full of creative activities.
